Physical and semantic evidence construction

(a) Five physical features

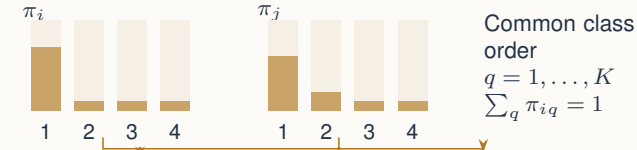

$\log(1+\cdot)$

Two canonical reports o_i, o_j

declared s.d.s

- $|\Delta t|/u_t$ — arrival time
- z_t — excess delay
- z_f — carrier
- $|\Delta B|/u_B$ — bandwidth
- $|\Delta D|/u_D$ — duration

(b) Protocol compatibility

Concatenate $[\phi_{ij}^{\text{phys}}, \phi_{ij}^{\text{sem}}] \in \mathbb{R}^6 \longrightarrow$ train-only standardization $\longrightarrow$ fitted logit ℓ_{ij}
